

# SIKA AT WORK

## EVANGELIC LUTHERIAN PARISH, OULU, FINLAND

FLOORING: Sika ComfortFloor® Marble FX

BUILDING TRUST

# EVANGELIC LUTHERIAN PARISH

## PROJECT DESCRIPTION

The staff at Oulu City Hall moved into a new residence during the renovation of City Hall. There was previously a linoleum floor that had to be removed as soon as possible before the arrival of the staff. The floors of the canteen and break rooms were coated with a new patterned method, giving the floor a completely refreshed and new look.

## PROJECT REQUIREMENTS

The schedule was tight, so the natural choice was a polyurethane coating which is quick to install. Sika ComfortFloor® can also encapsulate contaminants, so any VOC emissions were eliminated during the installation. The choice of product was also influenced by the good experience of the client with a previous Sikafloor® system. Now with the Sika ComfortFloor® Marble FX it was possible to create the desired pattern. A trial project was conducted in the canteen and break rooms and the floor has been successful and well received by visiting architects.

## SIKA SOLUTION

Sika ComfortFloor® Marble FX was the ideal solution to provide an easy-care and comfortable floor covering. The floor was sanded and levelled with Casco Floor Expert SP-X, a self-levelling floor screed. Priming was done with Sikafloor®-156; after which the elastomeric Sikafloor®-3000 FX was applied to the floor surface. After the coating had cured, Sikafloor®-304 W was applied. This is a UV-resistant, non-yellowing, matt surface finish.

## PROJECT PARTICIPANTS

**Owner:** Oulun Ev. lut. seurakuntayhtymä

**Contractor:** Heikkinen Yhtiöt Oy

**Products:** Oy Sika Finland Ab

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to any use.
